DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to an apparatus, classified in 15/77.

Group II, claim(s) 9-20, drawn to a method, classified in 134/6.

The inventions listed as Groups I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The apparatus claims of Group I and the method claims of Group II share a common feature of a brush and a two fluid nozzle. The common feature of the brush and two fluid nozzle does not define the "special technical feature", since the claimed feature does not define a contribution over the prior art, as evidenced by Sato (US2002/0189641) . Accordingly, the common feature, as recited in the method and apparatus claims are not considered as the "special technical feature" as defined by PCT Rule 13.2 Therefore, unity of invention is lacking according to PCT Rule 13.2. Where a group of inventions is claimed in one and the same international application, the requirement of unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or

Art Unit: 1792

corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.
